

DS Lawyers decided to dedicate a part of its professional team to help, support and encourage young entrepreneurs in their legal steps required for their business development. In 2015, the project called Powered by DS was created.

The idea is to propel start-ups towards success by accompanying and providing legal services adapted to their needs and budgets.

Our entrepreneurs find a reliable partnership to move forward and Powered by DS benefit from a very special and long-term relationship with its clients.

More than lawyers, we are your business partners!
